UPDATE #3: County Assessor Releases Third Report Of Wildfire- Damaged Properties

SAN BERNARDINO – County Assessor Bill Postmus released the third report of damaged or destroyed properties caused by the recent firestorms in San Bernardino County. Prior to this public release, officials from the Office of the County Assessor visited the Fire Emergency Local Assistance Center at the National Orange Show Events Center in the city of San Bernardino to meet with as many affected property owners as possible.

The third released report, which is a partial listing as more reports are forthcoming, includes addresses of damaged and destroyed properties in the community of Running Springs that have been confirmed by staff of the Office of the County Assessor. Reports Numbers One and Two are also available on the official website of the County Assessor's Office:

www.sbassessor.org

Staff members of the office of the County Assessor working as part of a county multi-entity Damage Assessment Team first gained entry into the Running Springs community once emergency responders deemed the fire-affected area safe for entrance. The identification process is ongoing and results from continued field work will be released as quickly as possible.

County agencies comprising the damage assessment teams include the Office of the County Assessor, HAZMAT, County Fire, County Code Enforcement and County Building and Safety.

It is expected that a damage assessment report from the communities of Enchanted Forest and Smiley Park will be available at some time today.

For further information regarding a potential loss and other county services that may be provided, property owners are encouraged to dial "211" or call 1-888-435-7565.

Here is an overview of the first report:

Community of Running Springs and Surrounding Areas:

Properties deemed Total Losses (51 -100% damage): 106 properties

Properties identified as "partial losses" (up to 50% damage): 18 properties

NOTE: Further and subsequent reports will soon follow.

ATTACHMENT: List of damaged and destroyed properties with addresses.

ADVISORY: Damage assessment information is being provided as a public service. All data has been verified, based on available information received to date. Yet, it is still possible that some information may be inaccurate or incomplete. This preliminary report reflects damage assessments conducted in the fire-affected areas that were considered reasonably safe to enter by trained County personnel. Every effort was exercised to ensure accuracy. However, as this is a preliminary report, property owners are advised to consult County sources for further updates on damage reports as more information becomes available. Information will be updated as soon as new data is received. Some damage assessments listed may be for secondary or accessory structures.
